

Next door at Buli's, we were pleased as press passes to be included in the recent celebratory book signing and party for the release of the incredible Jenny Block's autobiographical book, entitled "Open: Love, Sex and Life in an Open Marriage," which is heating up the presses and garnering rave reviews even as you read this.

The beautiful author actually wrote much of her book while sipping and supping at the Cedar Springs knoshatorium, and the swell soiree even included a custom cake

festooned with Texas-sized diamond rings in recognition of that association. Jenny, for the one or two of you that aren't aware, is married to a wonderful man...while maintaining a highly successful relationship with an equally stunning woman! We LOVE her!

We also love a particularly pleasing papi by the name of Francisco, whom we often spot at Mickey's when we're at the club for our evening dose
